The Arizona senator, who has previously called Mr Trump a "megalomaniac" and a "race-baiting xenophobe," has recently been pushing a theory that the President is not human. "Whether he's human, in fact, I think I'd take him up on that offer to have somebody look at him to tell us," McCain told Larry King in April. Mr McCain's steadfast refusal to support the President has become a point of contention within the GOP. The party is in crisis over Trump's outlandish behaviour, such as his feud with Senator Bob Corker, and some Republican politicians have called on him to resign. McCain, who has said that he will not run for president in 2020, has never commented publicly on the current state of the party, but he has not been shy about his views. Here are five times the senator made waves in the last few months. McCain shows no regret in flip-flopping on Trump after his primary loss In the most recent spat between the two men, Mr McCain refused to say that he was voting for Mr Trump in 2020. "I'm not going to say that I'm voting for him because I think the last thing we need is a third term for Donald Trump. I'm not going to say that because it's a dangerous thing for a

HTML Book Maker is a neat and user-friendly program that comes in handy when you want to make simple main covers for your HTML books or change the look of your preferred homepages headers and text. Lack of any help documentation The installation is swift and uneventful, while the provided interface is plain and uncomplicated, displaying all the options in neatly structured areas. Sadly, the app doesn't offer any help in the form of a short tutorial or as an integrated file, making it hard to understand its features. Easy steps to go through To get started, copy and paste the webpage or book URL into the provided field, and give it a corresponding name. Once added, you can view it in the list. In addition, it's possible to enter the header text and select its font type, color from a few predefined choices, size, and alignment. Plus, you can add the page title and pick the desired background color. No preview function or additional options What's more, the tool lets you set the links options, such as font type, size, color, style, and page alignment. Once you're done, all you have to do is hit the save button. Unfortunately, the app doesn't offer a preview area to find out how the output looks. Plus, the window can't be resized to a bigger dimension to view the properties better, and doesn't provide any additional settings, close or minimize buttons. All in all In conclusion, HTML Book Maker is a simple and handy utility designed to offer a quick and easy method to create main covers for HTML books, as well as change the look of webpages using just the address link. The lack of essential functions leave much to be desired and limits the ability to fully customize the page.So when the walls came tumbling down, it was a good time for a nice tall latte Behind the long-haired brute-master of a firebrand who calls himself Anakin Skywalker was an obscure, second-rate Jedi: Obi-Wan Kenobi. Although he never met the man who would come to be known as Darth Vader, Obi-Wan knew him before he became that familiar evil face with the white-blond hair that slicked into ringlets down his neck. Anakin's story begins and ends with Obi-Wan. Born into a lavish, wealthy, aristocratic family in the remote planet Naboo, Anakin was the pride of his clan and the son he cherished. Like a son to his parents, Anakin adored his grandmother, Queen Amidala. She raised him and loved him, and he loved her in return. But life in his family was far from idyllic. When Anakin was about 10 years old, his family's home was destroyed
